How to do the gta 5 cayo perico heist. Gta 5 online cayo perico heist guide. How to do the cayo perico heist gta online. Gta 5 online cayo perico heist solo guide deutsch. Gta 5 online cayo perico heist solo guide. Gta 5 online cayo perico heist guide reddit.

Complete a small hacking minigame to obtain the information you need, then head back outside. Approach the elevator to initiate a cutscene and move to the penthouse floor. Now that your Approach Vehicle and Equipment is taken care of, it's time to secure your Weapon Loadout. During the heist, people will only be able to steal two paintings. This first part of the heist entails traversing the island and photographing items for use in the heist. NOTE: At this point, you can gather more loot from around the complex, and all around the island, but we have everything we need to complete the operation successfully. Head towards the glowing yellow spot near the gate to exit the compound, then either grab a vehicle or run towards your chosen escape point to complete the Heist and claim your reward. Next, run up the road and kill the NPC standing by the bike. Options: If you want to complete a stealth Heist, which is by far the safest route when completing the Cayo Perico Heist by yourself, you'll need to get the Cutting Torch. A full display of gold will fill up more than half the bag as well. This is the first GTA Online Heist that can be completed solo, but you can also bring along your trusted allies to make things interesting. NOTE: This guide will tell you how to finish the entire Heist alone. Now that all of the Prep work is done, you are ready to initiate the Finale. Use a dinghy to get back to land, then drive to the airport. Kill him and head toward the large crane. Take the door on the left to enter the club. In addition, players will want to get the New Sparrow for transport from the submarine. Users can load back in to a previous checkpoint and try again. Use a Shotgun, or other close-range weapon to take out everyone in the office, then approach the laptop towards the back of the office. Thankfully, these only need to be photographed during the first playthrough. Once you head inside, you'll complete the mission, and be able to move on to the Finale. However, the heist can be repeated for a steady flow of cash. At this point, you can continue scouting the island and taking note of additional valuables, but you also have all the essentials needed to begin the next phase of the Heist. Scoping Out The Island Cayo Perico is the first heist that can be completed solo. Hop into the driver's seat and drive your host to his compound, then, after the show starts, sneak away. At this point, you'll have a short time before your location is broadcast to other players. Approaching The Compound The items needed will depend on the way players choose to enter the compound. There are a few missions people need to complete to activate the heist. Once you've finished it, head into the elevator and ride it to the bottom. The first is a tour manager, and the second is a smuggler. The Madrazo Files The main target of the heist is the Madrazo files. From the customer service desk at The Diamond Casino, turn around and take the elevator down to The Music Locker. Once you are ready to go, select Start from the menu aboard the Kosatka and the Finale will begin. The same principle applies to the getaway. With that key in hand, people will need to head down the stairs into the basement. The first is to eliminate all of the guards in the courtyard with suppressed weapons, Gamers can ride the bike down the mountainside to reach the main dock below. Kill the guards or simply run to the glowing elevator to escape the casino. Once you reach the bottom, use the Cutting Tool to break through the gate, then turn left. Once you are done scoping out the compound, head to the North Dock to continue. If you are close to the coast, it will surface nearby. In order to complete the mission, gamers will need to purchase a submarine from Pavel. Quickly move to the tables in the back to find the Fingerprint Cloner, then head back outside. Kill any guards along the way and approach the main gate for the cut scene to initiate. Feel free to look through other cameras to find optional rewards like cash, weapons, and more, or leave now to continue. Grab the weapons and head outside, where you'll be attacked by two helicopters. Players: 1-4 (Heist Prep, Setup, and Finale Mission) An infamous drug lord, who goes by the name "El Rubio," has stolen sensitive documents from the Madrazo crime family, and is attempting to blackmail them. Pavel will message you the code for the safe, so use it to open it, securing the Madrazo Files. There are no guards in this section, but there are still two cameras, so go ahead and destroy them before heading inside. Once you've picked up the files, head right to reach a gate with a keycode entry gate, then use the key you got from the guard to bypass it. The Final Stretch Once on the dinghy, there will be another enemy on the left. NEXT: Every Grand Theft Auto Game (In Chronological Order) Pokemon Fan Predicts Spriggatto's Evolution Payton Lott (431 Articles Published) More From Payton Lott The Cayo Perico Heist is a Heist in Grand Theft Auto Online which tasks players with infiltrating a fortified island to obtain sensitive documents and return them to the Madrazo crime family (and steal whatever isn't nailed down). The terminal on the far left side of the desk is the Penthouse computer, so use it to purchase a Penthouse. The only way to access the basement is to hack the fingerprint scanner. Once you are inside, make your way through the dance floor and head to the VIP section on the left to initiate a short cutscene. However, the more complex the plan is, the better the chance of getting caught. At this point, you'll need to complete a Heist Prep Mission, which will be different based on which vehicle you want to use to infiltrate Cayo Perico. Approach Vehicle: Submarine Entry Point: Drainage Tunnels Exit Point: Main Docks It is a good idea to attempt the heist at night because it will be harder for guards to spot the character. At this point, all you have to do is get to an exfiltration point, so move past the guards the same way you did on the way in. Once the head of security is dead, take the safe codes from their body, then head back to the elevators. Finally, you'll need to find some Bolt Cutters. Submarine Kosatka Cutting Torch Fingerprint Cloner Safe Code (if the target is in the safe) Plasma Cutter (if the target is inside the display cabinet) Crack Shot (spend the \$5,000 for suppressors) Gamers also have the option of paying for an airstrike, supply drop, sniper, recon, etc. As a general rule, the following methods are the easiest. Keep in mind that those Crew members will cost you money to hire, and you'll need to select certain approaches, or complete additional objectives during the Heist, to make use of them. This time around, players are tasked with helping Miguel Madrazo retrieve information from one of the drug lords in Cayo Perico. Let it get as close to overheating as possible and it will slice through the glass quicker. Approach the southeastern gate, then cross the runway to find the private hangar. This will enable you to blend in, as long as you still try to avoid staying too close to enemies for too long. Take out the handful of guards, then approach the table in the back to find the laptop which holds the archive location. Once you reach the runway, Pavel will radio and tell you he needs a photo of the control tower. After that, search the surrounding warehouses and send Pavel more pictures of things you will be able to steal once the Heist is underway. If you find the box nearby, you can shut the security system off, but it's honestly easy to just go in, guns blazing, so head inside. There will be a few enemies by the guard shack that need to be killed as well with headshots only. For this mission, you'll need to head to 707 Vespucci. Head to the marked area to find the O'Neil Brothers. Gather what information you like, then head back to the airfield. It can be dropped into the water towers to contaminate the water supply. This will allow us to avoid the vast majority of enemies during the Heist, and it will allow us to complete it in pure stealth, minimizing the risk of failure, even while playing solo. At this point, you can select from any of the options you've prepared for, and you can Hire Support Crew to assist you during the mission (even if you are playing Solo). Head to the Diamond Casino and head inside, then turn left and approach the customer service desk. One of these guards will hold a key to the basement, but it is always a random guard. Once you own a Penthouse, you'll gain access to The Music Locker, a club in the basement of The Diamond. Climb aboard and ride out to the Kosatka, then climb on top and find a hatch, then head inside to meet Pavel. There is one camera on the outside of the shack that should be destroyed too. Each heist, one of the four other notable targets will appear: Bearer Bonds Panther Statue With Jewels Pink Diamond Ruby Necklace Sisimoto Tequila Gamers can access the compound CCTV cameras to identify the files and targets of note. This means that cocaine and artwork should be the priority as a solo queue. Once the path ahead is clear, head up the stairs to the right and you'll see a multi-story building on your left. Select the mission from the Heist Prep station, then take a Dinghy ashore and grab a vehicle. Having a plan decreases risk and saves extra time for improvisation. Avoid being seen by cameras and guards and you'll arrive outside El Rubio's compound. Open the Interaction Menu (hold down Touchpad/View button for several seconds) and select Services, then go to Kosatka and request the vehicle. In order to secure the Demolition Charges, select the prep mission from the Kosatka menu, and a waypoint will be set on the northeastern part of Los Santos. Bag Limits Rockstar have included bag limits for the heist, making strategic looting a priority. Madrazo wishes to impress his father, and needs a way into the island to get the files. Once you reach the bottom, exit the elevator and head down the spiral staircase. Also, the value of these items is now completely RNG. Once you are through, continue swimming up through the tunnel and into the glowing yellow area to enter El Rubio's compound. Get these while on the island, and receive a \$1.1 million dollar reward. Another part of the first step is photographing locations around the island. Make your way there and head inside, then clear them out until one of them drops a security card, which grants access to the basement, where the explosives are kept. Pavel will give you a waypoint in town, so head there and you'll find a yellow glowing area you can use to enter the warehouse. If you don't want to do the "stealthy" approach, you can opt to use Demolition Charges in your assault. These are temporarily of help, but not that important. Tracking the secondary targets is important too, as it will lead the player on the most efficient route to secure valuable loot. Once the long cutscene finishes, players will need to survey the island. Rockstar added the Cayo Perico Heist to GTA V in a December update last year. Head down the runway and get a picture, then send it to him. Select it from the menu aboard the Kosatka, then head outside. From there, head down into the construction site and look for toolboxes with glowing green arrows. Dive underwater to avoid patrolling boats, and you can simply swim to your exfil point, making for a more time consuming, but safer exit. Sponsored by AWS Game Tech Get precision kills on the guards to pick up the additional loot. Use suppressed weapons and hit headshots to keep the guards from alerting others. Make your way there and you'll have the option to go in the front door, guns blazing, or via the roof. Climb that staircase and head left, around the corner and kill the guard with a suppressed headshot. During the survey objective, people will have two different disguises. This will be the primary path to the docks. If you can bring friends, that's a bonus! To begin The Cayo Perico Heist, you'll need to sort out a few things first. NOTE: If you don't want to deal with other players, simply play this mission in Invite Only mode. Return to the Kosatka to complete the prep mission. Once you've bought the Kosatka, you'll have access to your new contract, and submarine operator, Pavel. Drive to the construction site and head to the glowing yellow spot in the elevator to proceed inside the building. Cycle through the cameras until you find the Basement feed, then turn the camera left to get a view of the safe. There are nine of them, and they put up quite a fight, so be sure to bring body armor and heavy weapons. Your location will shortly be broadcast to other players, so hurry back to your dinghy and the Kosatka to complete the mission. Check your corners, as enemies are hiding to shoot you as you pass. NOTE: If you don't want to deal with other players, simply play this mission in Invite Only mode. You'll need a Safe Code to gain access to the files Madrazo wants, so accept this section of Heist Prep from the planning station aboard the Kosatka, then head to the Diamond Casino. The Madrazo Files are always inside the safe in the basement of the compound. Turn right to find the box, then hack in and solve the puzzle to gain access. Take any hostile forces out and head back to the elevator to return to ground level. Each of the missions that must be completed are listed below. Take a picture and send it to Pavel, then you'll have to make a choice. If one of the targets is in the display case, the plasma cutter must be used. To have these options available, the control tower defenses must be disabled during the heist. Turn left and head back up to the main area. Then, gamers can check out secondary targets and plan their escape. Gamers will want to make sure they get the Powder Cleaner. Facing the ocean, turn right and head up the stairs, then turn right again. Once you reach the Bridge, take out the crew there and grab the package, then head back out the way you came in and board the Kosatka to complete the mission. Swim from the Kosatka to the grate, past the mines, then use the Cutting Tool to sever the grate at the highlighted green points. Make sure to scope out the getaway area before jumping into the heist, there might be a few extra valuables to pick up on the way out. Open your phone menu (Triangle/Y) and head to the Internet app, then go to Warstock Cache & Carry. For a quick escape, kill all of the enemies to the left near the dinghy. There are secondary targets that can be looted there as well, but they are guarded by a handful of enemies to the right of the dock. First, you'll need to be a VIP, CEO, or Motorcycle Club (MC) President. There are obviously a number of other secondary targets and heist strategies, but this is the most straightforward. The cheapest option is \$2 million, but a decked-out vessel will cost \$9 million. Once it's over, you'll be on the island with El Rubio. Options Boat: Stealth Annihilator We're going with the Kosatka approach, so head to the highlighted section of the seas around Los Santos in the Kosatka, where we'll approach the Merryweather Test Site to obtain a sonar scrambler. NOTE: To speed things up, you can sit down at the brake controls on the Kosatka and select Fast Travel to move to the section of the ocean that is closest to the destination, or you can travel via land, then use Services on the Interaction Screen to send the Kosatka, then call for it again, and it will spawn in the water near you. Use the Periscope to target and fire missiles at the boats and helicopter near the base, then jump into the water and dive. Either take them out or try to outrun them back to the Kosatka. During the Heist, you'll need to keep a close eye on patrolling enemies via your minimap. Head from toolbox to toolbox until you've found the cutting tool, then grab it. Once you have an opening, head to the well-lit room ahead with the dartboard, and wait for another clearing in enemy patrols. Thus, the survey portion of the heist is essential. This will help the user plan an approach to hit each of these targets before the getaway. Exit Strategy The only way out is through the main gate. The Madrazos will stop at nothing to get them back, and have enlisted your aid, as well as that of a Russian submarine operator named Pavel, to infiltrate Cayo Perico and steal them back. Once you are inside, you'll be very close to El Rubio's office. As a reference, the following list shows the most profitable loot per bag. After selecting the first leg of the Heist from the terminal, you'll need to meet Dave and Keinemusik at the LSIA Private Terminal in southern Los Santos. A cutscene will begin and the heist is complete. One of them should drop a gate key that we'll use during the escape. Approach the desk to pick up a key, then move to the keypad and begin hacking it. For example, the supply vehicle and guard clothes are only necessary if the plan is to go through the front gate. This Heist Prep Mission becomes available after you have scoped out the Drainage Grate Infiltration Spot, so make sure you've done that in Heist Intel before attempting to proceed. Follow the hallways around to Apartment 512, then use a silenced weapon to take out the guards and maintain the element of surprise. Make your way to the tower, then head through the gate and climb the ladder to reach the upper platform. The top option should be the "Kosatka" submarine, which you'll need to purchase to proceed. After taking care of that final enemy, it is time to speed away. Once in the compound, there are two possible strategies. Failure is not a big deal. Escape from the cops (or simply allow yourself to be killed), and you'll complete the mission. This is the goal. As soon as people arrive at the grate, they can use the cutting torch to proceed. There is an elevator in the room that can be hacked to reach the basement. The guard clothes can be useful, as it will take guards longer to identify that there is an imposter. Gamers can queue into this mission by themselves without the need for teammates or a public lobby. If you decide to take the direct approach, take out the guards outside the office, then head inside to reach the proper floor. Likewise, the grappling hook is used to enter by climbing up the north or south wall into the compound. You can cut left and find a boat to take to the other side of the island and get there a bit faster, or you can cut right and make your way through the island's defenses on foot. Once you are outside, you have a few options. This may not seem like much after spending \$4 million to get there. One final enemy is hiding next to the crane. Check Pavel's picture in the Messages section of your phone to get an idea of what they look like, if you need. You can register in the SecuroServ section (or other parts) of the Interaction Menu to make that happen. Once that's done, head back to the main building, just off the runway, and speak to the pilot to return to Los Santos. Mandatory Preparatory Missions There are sixteen prep missions in total, but not all of them are important to finish. Completing The Heist There are a few things everyone must do successfully to complete the heist: Only kill enemies that must be killed Keep NPCs from triggering the alarm Follow a planned route Those that have conducted proper surveys will know where each target is, and the proper path out of the compound. We're choosing a stealthy approach, using the Kosatka to approach and cut through the drainage grate. Gold and Cocaine are the two best secondary things to loot during the heist. From there, continue to climb the ramps and stairs to reach the rooftop, where the Cutting Tool is located. Approach to initiate the cutscene. Additionally, if you don't already own a Penthouse at the Diamond Casino and Resort, you'll need to buy one. Before heading to the area where the construction workers are patrolling, pick up a Hardhat and equip it. Equip some Body Armor and a close-range weapon like a Shotgun or SMG, then make your way to the bridge. The main key to success during the heist is knowing where all of the valuables are on the island. Pavel will call and tell you about a communications tower you can use to hack into the CCTV's and find the vault. After a short cutscene, you'll gain access to the bridge. Continue around the corner and up the stairs to find the entrance to El Rubio's office, stealthily killing each guard you come across. Once you arrive, take a picture of the water, then send it to Pavel (Square/X button). As soon as the patrol boat passes by the inlet, throttle down and head to sea. NOTE: If you don't want to bother with defenses, head to the field next to their hideout and stand behind the storage container and construction equipment and fire a grenade launcher over the storage container. Once you've secured your approach vehicle, you'll need to obtain some equipment to make the break-in possible. If you are seen, there aren't many enemies, although the majority of them have are heavily armed (for some reason). Make your way back to the Kosatka and access the planning board to begin the next section. In total, this will set people back around \$4 million, as long as they opt for the cheap submarine. After getting these items, preparations for the heist can begin. Head down to the basement and take out the two guards there, then pick up the crate of explosives and head back to your car. Get back in your car and outrun the hostile players or NPCs. Make your way back to the Kosatka to complete the mission and unlock the stealthy approach in the Heist Finale. Head inside and kill all the guards until you find the head of security. The guards will be less aware and reactive as a result. Options Aggressor Conspirator Crack Shot Saboteur Marksman Suppressors We chose to pick up the Conspirator Weapons Loadout. Basic Walkthrough The entry point will be the drainage tunnels. After players have access to the basement, they will need to check the codes to the safe, which were sent by Pavel. Approach the submarine's glowing yellow hatch to head inside. Keep cycling through the cameras until you find Office - Cam 1, which is El Rubio's office. Gold Cocaine Paintings Marijuana Stacks of cash Gold only spawns when playing the heist with at least one partner. An alternative method is to find El Rubio's office in the compound and loot his safe. It has a fingerprint lock on an elevator leading to the basement, which is the last thing you need to finish this leg of the Heist. The following items are of note during this step: Bolt Cutters Chests With Guard Outfits Grappling Hooks Powder Cleaner Supply Vehicle Every time the heist begins, these items will be located in different places. You have a few options, but you'll need to get most of them before moving on to the Heist Finale. You'll need to solve several fingerprint cloning puzzles, so make the figure on the left match the one on the right to complete it and proceed. NOTE: You can also set the Kosatka as your spawn location, which can save a ton of time by logging out and logging back in. Next, use the same menu to Request A Dinghy, which will spawn a boat near your location. Pick up the keyboard, then head to the basement gate and lock it. In order to obtain the Fingerprint Cloner, you'll need to select it from the Prep screen on Kosatka. Guarding the entrance are two security cameras. Complete a short hacking minigame, then examine the wall nearby to find the weapons locker. Pavel will give you the second location, so head there next. After meeting Miguel Madrazo, who will ask you to infiltrate Cayo Perico and take back some sensitive files the drug lord "El Rubio" has in his possession, leave the casino. You can use this strategy to kill them all without worrying about being hit, yourself. Once they are all dead, Pavel will note that the demolition charges aren't here, and he'll direct you to the O'Neil home, instead. If you are having trouble escaping, remember that the water is almost entirely safe. Make sure to identify the drainage tunnel while surveying the island, as it will unlock the "Cutting Torch" mission. Head towards the water from the first warehouse and you'll find them sitting on a ledge. Following a fruitful heist, people may want to get greedy and fill up their coffers even more.
